DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/258,499, filed on 26 February 1999. ***Allowable Subject Matter***

2. Claims 13-18 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding independent claim 13, the prior art of record neither shows nor suggest a method for manufacturing a display apparatus including a thin film transistor formed over a substrate, the thin film transistor having a source electrode and a drain electrode, and an electroluminescence element formed over the thin film transistor and having a luminous element layer between a lower electrode and an upper electrode, wherein the lower electrode, the luminous element layer, and the upper electrode of the electroluminescence element are formed over the thin film transistor in that order, the upper electrode being formed using a non-transparent metal material and through evaporation so that the upper electrode has a planar shape covering a portion of a display pixel region in a unit display pixel region, and light emission from the electroluminescence element is emitted to the outside from an upper electrode side opposite of the substrate.

Regarding independent claim 16, the prior art of record neither shows nor suggest a method for manufacturing a display apparatus comprising the steps of : forming a thin film transistor having a source electrode and a drain electrode over a substrate, forming

at least one layer of insulating film covering the thin film transistor; and after the formation of the insulating film, forming an electroluminescence element having a luminous element layer between a lower electrode and an upper electrode, by forming a light reflective conductive material layer as a lower electrode, forming a luminous element layer, and forming an upper electrode on the luminous element layer through evaporation of a non-transparent metal material layer having a planar shape covering a portion of a display pixel region within a unit display pixel region, wherein light emission from the electroluminescence element is emitted to the outside from the side near the upper electrode opposite of the substrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Due to their dependency, claims 14, 15, 17, and 18 are necessarily allowable.
